MINUTES
FOR THE 7th MEETING OF THE SENATE POSTGRADUATE COMMITTEE (2024-25) TO BE HELD ON April 2, 2025 (Wednesday) AT 10:30 AM
CONFERENCE ROOM (208), ACADEMIC AFFAIRS BUILDING

Members Present: Prof(s): Appu Singh on behalf of Suresh Kumar (BSBE), Basker Sundararaju (CHM), Ark Verma (CGS), Gourabananda Pahar (CE), Soumik Das on behalf of Dipin S Pillai (CHE), Piyush Rai (CSE), J Ramkumar (DES), Sukumar Vellakkal (ECO), Imon Mondal (EE), Animesh Mandal (ES), Rajarshi Sengupta (HSS), Subhankar Mukherjee (DoMS), Anikesh Pal (ME), Sudhanshu S Singh (MSE), Pankaj Wahi (NET), Sudhansu Shekhar (MATH), Sagar Chakrabarty (PHY), Prabodh Bajpai (SEE)

Members Absent: Prof(s), P M Mohite (AE), Pritam Chakraborty (MSP), Sapam Ranjita Chanu (PSE), Kunal P Mooley (SPASE),

Senate Nominee: Prof(s) Abheejeet Mohapatra, Naveen Tiwari

Student representatives: Mr. Kartik Rout, Mr. Anubhav Jain, Mr. Saurabh Sona Lahamate

(A) Confirmation of minutes of 6th SPGC meeting held on February 27, 2025

The minutes is confirmed

(B) Noting of approval/recommendation given:

1. **Proposed changes in the eligibility criteria for admission in M.Des Programme:** SPGC chair had circulated an email to SPGC members on the recommendation of proposed changes in the eligibility criteria for admission in M.Des programme. The proposed changes (recommended by SPGC) is provided in Annexure B.1. This matter is to be sent to Senate.
2. **Gate paper codes, course template and no. of seats for M. Tech programme in Artificial Intelligence for Sustainability under the Kotak School of Sustainability:** SPGC chair had circulated an email to SPGC members on the approval of Gate paper codes and course template. In addition, number of seats for the programme to be recommended. The related document is attached as Annexure B.2. Gate paper codes and course template have been approved by SPGC. In addition, on the query raised by Department of CE on CE663, the school has informed that it can make alternative arrangement on the same line as CE663, if needed. The recommended number of seats to be sent to Senate.
3. **Termination of students not registered in 2024-25-2:** In the 6th SPGC meeting, it was decided to provide final deadline of March 5, 2025 to students for registration (with valid reasons) and after that the students will be terminated from programme based on clause 5.7 of the PG manual. The final list of students terminated under 5.7 is provided in Annexure B.3.

(C) Item requiring SPGC Approval:

a) Conversion from MSR/MTech to PhD Program:

S.No	Roll No	Name	Dept	Prog	Supervisor & DPGC Recommendation	Remark	SPGC Recommendation
01-	231010052	Piyush Dewangan	AE	MTech	Recommended	CPI=7.38, CU=81 Last Qualification-BTech -69.79	Approved
02-	241010071	Umesh Chandra	AE	MTech	Recommended	CPI=9.25, CU=36 Last Qualification-BTech-74.34	Not Approved as the student does not satisfy either clause 4.6.(a) and 4.6.(b) of the PG manual.
03-	22102038	Priyanka Pal	CHE	MTech	Recommended	CPI=7.50, CU=54 Last Qualification-BTech- 80.96	Not Approved as per clause 4.6 of the PG manual, which states that the conversion is allowed in the beginning of 2nd/3rd/4th/5th semester only

Sudhe

MINUTES
FOR THE 7th MEETING OF THE SENATE POSTGRADUATE COMMITTEE (2024-25) TO BE HELD ON April 2, 2025 (Wednesday) AT 10:30 AM
CONFERENCE ROOM (208), ACADEMIC AFFAIRS BUILDING

b) New course approval:

Course No	Title	Credits	Instructor	SPGC Decision
CHE601M	Elementary Engineering Mathematics	3-0-0-0-(5)	Dr. Naveen Tiwari Dr. V Shankar	Approved
CHE602M	Introduction to Transport Phenomena	3-0-0-0-(5)	Dr. Naveen Tiwari Dr. V Shankar	Approved
CHE603M	Introduction to Thermodynamics	3-0-0-0-(5)	Dr. Indranil Saha Dalal Dr. Vishal Agarwal Dr. Soumik Das Dr. Goutam Deo Dr. Salman Ahmad Khan	Approved
CHE604M	Fundamentals of Chemical Reaction Engineering	3-0-0-0-(5)	Dr. Indranil Saha Dalal Dr. Vishal Agarwal Dr. Soumik Das Dr. Goutam Deo Dr. Salman Ahmad Khan	Approved
CHE615	Microhydrodynamics and Suspensions	3-0-0-0-(9)	Dr. Indranil Saha Dalal	Approved
CHE657	Machine Learning in Chemical Engineering	3-0-0-0-(9)	Dr. Salman Ahmad Khan	Approved
CHE658	Mathematics for Machine Learning	3-0-0-0-(9)	Dr. Indranil Saha Dalal	Approved
EE682	Real Time Simulation of Electric Power System with Microgrid	3-0-0-0-(9)	Dr. Gururaj Mirle Vishwanath	Approved
MBA791M	The Political Economy of Climate Change	3-0-0-0-(5)	Dr. Jothsna Rajan	Approved
MSE644	Computational Materials Thermodynamics	3-0-0-0-(9)	Dr. Soumya Sridhar	Approved

c) Termination under 5.7 and 8.6:

S.No	Roll No	Name	Dept.	Prog.	Supervisor & DPGC Recommendation	Remark	SPGC Decision
01	241290609	Ndungutse Felicien	SEE	PhD	Recommended	Termination under 5.7	Approved
02	241290601	Abhijeet Singh	SEE	PhD	Recommended	Termination under 5.7	Approved
03	22201265	Sandeep Kumar Rajput	AE	PhD	Comprehensive exam failed two times	Termination under 8.6	Approved
04	22114264	Baidurya Mukherjee	DOMS	PhD	Recommended	Termination under 5.7	Approved

d) Change of registration from full-time to part-time:

S.No	Roll No	Name	Dept	Prog	Supervisor and DPGC Recommendation	Remark	SPGC Decision
1.	231050039	Joydeep Das	ME	MTech	Recommended	CU=72 TU=18 CPI=7.50 NOC - provided	Approved
2.	19104277	Satish Srivastava	EE	PhD	Recommended	CU=36 TU=387 CPI=7.50 NOC - provided	Approved

e) Transfer from M.Tech./ M.Des. to M.Tech./ M. Des. (with project)

S.No	Roll No	Name	Dept	Prog	Supervisor and DPGC Recommendation	SPGC Decision
1.	231020006	Athitha Kandan J	CHE	MTech	Recommended	Approved. The student will be awarded M. Tech (with Project Degree).
2.	231020040	Shivam Mishra	CHE	MTech	Recommended	Approved. The student will be awarded M. Tech (with Project Degree).
3.	21223265	Subhajit Chakraborty	ES	MTech (PhD Exit option)	Recommended	Not Approved. M.Tech (with project) option is not for students exiting PhD programme with an M.Tech degree.
4.	231040117	Tirunagari Rahul	EE	MTech	Recommended	Approved subject to confirmation from the student on transfer from M. Tech degree to M. Tech (with project) degree as per clause 7.9 of the PG manual.

f) Course Drop Request

S.No	Roll No	Name	Dept	Prog	Course No	Instructor Recommendation	DPGC Recommendation	SPGC Decision
1	241010039	Mohamed Asleem M	AE	MTech	ME752	Not permitted	Recommended	Approved. To be sent to Senate as a noting item.
2	241010073	Vighnesh Ganesh Nimje	AE	MTech	AE621	Not permitted	Recommended	Approved. To be sent to Senate as a noting item.
3	231060601	Durfishan Mushtaq	MSE	PhD	MSE801 MSE799	Recommended	Recommended	Approved
4	242010001	Arjun Gautam	AE	MTech	AE621	Not permitted	Recommended	Approved. To be sent to Senate as a noting item.

For mid-sem drop requests, SPGC chair to also form a sub-committee to recommend changes in the current procedure, if any.

g) Request to appoint External Co-Supervisor

Requests discussed in 6th SPGC meeting

Note: SPGC discussed the matter of addition of external co-supervisor for IIT Kanpur students and decided that NOC from the head of section/organization/institute of external co-supervisor be provided with the application. This is in line with the process of addition of IIT Kanpur faculty as external co-supervisor for students from other institutions.

S. No	Roll No	Name	Dept	Prog	Supervisor and DPGC Recommendation	Approval for Co-Supervisor	SPGC Recommendation
1	21203275	Ratnesh Kushwaha	CE	PhD	Recommended	Prof. Alexander Kehm Prof. Mathis Biobfeld, Germany	After due deliberation, SPGC does not recommend two external co-supervisors. This is also in line with clause 11.1.4 of PG manual. Moreover, external co-supervisor needs to provide NOC from institute/organization
2	241230608	Gayatri Sahoo	ES	PhD	Recommended	Prof. Arun Kumar Ojha-NGRI, Hyderabad	External co-supervisor needs to provide NOC from institute/organization
3	21203265	Apratim Biswas	CE	PhD	Recommended	Prof. Markus Hollaus Prof. Norbert Pfeifer Vienna University of Technology (TU Wien) Austria	After due deliberation, SPGC does not recommend two external co-supervisors. This is also in line with clause 11.1.4 of PG manual. Moreover, external co-supervisor needs to provide NOC from institute/organization
4	231120002	Akshay Kumar Choudhary	MSP	MTech	Recommended	Dr. Ashish (Principal Research Engineer-SAMTEL)	Not recommended as clause 11.1.3 was not followed.
5	19112263	Puneet Singh Parmar	MSP	PhD	Recommended	Dr. Ashish (Principal Research Engineer-SAMTEL)	Not recommended as clause 11.1.3 was not followed.

New requests

S. No	Roll No	Name	Dept	Prog	Supervisor and DPGC Recommendation	Approval for Co-Supervisor	SPGC Recommendation
1	241060020	Saiful Islam	MSE	MTech	Recommended	Dr. Subrata Mukherjee Head, AMCRG, R&D, Tata Steel Ltd	External co-supervisor needs to provide NOC from institute/organization

2	231040617	Soumya Chakravarty	EE	PhD	Recommended	Dr. Anwesha Khasnobish Scientist, TCS Research & Innovation Labs, Kolkata, India	External co-supervisor needs to provide NOC from institute/organization

H) Items requiring SPGC recommendation for Senate/Senate Chairperson considerations:

a) Appeal for reinstatement:

S. No	Roll No	Name	Dept	Prog	Supervisor/Course Instructor, Recommendation	DPGC Recommendation	SPGC Recommendation
1	231010615	Smrutiranjan Nayak	AE	PhD	Recommended	Recommended	Recommended for 2025-26-I

b) Exit from PhD programme with MTech/MS-Research Degree

1	19204013	ASHWANI KUMAR	EE	MTech	Recommended	Recommended	Recommended

M) Any other item with the permission of chair:

MINUTES
FOR THE 7th MEETING OF THE SENATE POSTGRADUATE COMMITTEE (2024-25) TO BE HELD ON April 2, 2025 (Wednesday) AT 10:30 AM
CONFERENCE ROOM (208), ACADEMIC AFFAIRS BUILDING

Sr.	Item Description	SPGC Recommendation
1.	Request to continue PhD program remotely: Mr. MOSAB SHAABAN SHAHEEN-17111265-CSE	After due deliberations, SPGC does not recommend the request of the student as a registered student must be on leave or in campus
2.	Semester leave request - SUBHASH DADARWAL-22103071-CE (Thesis supervisor's recommendation is negative for Semester leave, CPI=8.58,TC=72, CC=72)	Supervisor does not recommend semester leave but DPGC has recommended it. After due deliberations, SPGC approved semester leave request of the student for semester 2024-25-2.
3.	Request for thesis submission extension for the six month for medical reason, Anubhuti Saha-15219261-DES- Open Date 04-10-2024	Considering the medical condition, SPGC approved the extension request of the student.
4.	Request for extension to conduct comprehensive examination Ms Apoorva Mishra- 231140601-DOMS	Based on the recommendation of DPGC, SPGC approved the request.
5.	Pending physical document verification for Y24- January Batch (deadline was March 5, 2025)	SPGC chair presented the status of document verification for which the deadline was March 5, 2025. Three students have not submitted the required documents: 1-Amit Kumar(242040603)-EE,2-Shyam Sundar Thakur(242010604)-AE, 3-Tanzeem Hussain (242070623)-CHM.DPGC convener of Department of Chemistry informed that in spite of contacting the student, he has not responded. In this view, SPGC decided to recommend the cancellation of admission of Tanzeem Hussain (242070623)-CHM. This matter to be sent to Chair, Senate for approval. Based on the requests from other two students and recommendations from DPGC, SPGC decided to provide a final extension till April 23, 2025. After this date, the SPGC will recommend the cancellation of admission of students and same will be sent to Chair Senate for consideration.
6.	Correction in Tutorial credit (3 credits) in ANNEXURE-III of PG Manual	As tutorial is of 2 credits, SPGC approved this change.

7.	Proposal for award of MSR degree with PhD degree to those students who are admitted to PhD program in Sciences directly after a 4-year undergraduate degree	There was a proposal from Department of Physics to offer MSR degree with PhD degree to those students who are admitted to PhD program in directly after a 4-year undergraduate programme (Annexure M.7-A). The feedback from the Department were sought on this as well (Annexure M.7-B). It is to be noted that the Senate in its meeting held on 28-11-2014 had approved MSR degree only for Engineering Departments. However, based on the PGARC report, the Senate has also approved MSR degree as an exit degree for students admitted to PhD program in the Sciences Department (clause 7.8.2 of the PG manual). With this background and for the benefit of the PhD students, SPGC proposed the following: (a) Award of MSR degree with PhD degree to those students who are admitted to PhD program in directly after a 4-year undergraduate. (b) To simplify, clause 11.7.1. and 11.7.2 to be combined, i.e., existing clause 11.7 to be restructured. Also, deletion of clause 3 in Annexure V of PG manual is needed. This proposed modification in the PG manual has been provided in Annexure M.7-C. This matter is to be placed in the Senate for discussion and approval.
8.	Offering Profession and Communication Skills Course (XYZ888; XYZ is department code) and seminar course (XYX801) in modes other than offline mode	The Senate in its 569th meeting did not approve the proposal of SPGC for the waiver of XYZ801 for PhD students who are working professionals (documents attached). It was pointed out that compulsory courses cannot be waived. The Senate had also directed the SPGC to discuss this matter to meet the requirements of the two seminar courses and XYZ888. After due deliberations, SPGC requests the Senate to cancel the approval of waiver given to PhD students, who are working professionals, for XYZ888 in its 564th meeting. In addition, SPGC recommends that Departments/IDPs should be allowed to offer these courses (XYZ801 and XYZ888) in some other modes (such as online) for PhD students who are working professionals and have returned to their parent organization after completion of courses. This matter is to be placed in the Senate for discussion and approval.
9.	Changes in comprehensive exam timeline	Currently, the course credits requirement in Departments/IDPs is 36-54 for students admitted with masters degree, whereas it varies between 36-72 (for almost all) for students admitted with bachelors degree. Therefore, it is expected that students can complete course work in 1-2 semesters (if no backlogs). Considering the Senate approved "Open Seminar in 9th Semester or OS9S" policy and recommendations of Academic Practice Committee (APC) (Annexure M.9-A) and related feedback from Departments (Annexure M.9-B), SPGC recommended that students complete their comprehensive exam at the earliest after completion of course work. In this view, the proposed changes in the PG manual has been provided in Annexure M.9-C. This matter is to be placed in the Senate for consideration.
10.	Extension of DMC report submission deadline for Semester 2024-25-2	Based on the requests from faculty members and students, SPGC recommended the extension of DMC report submission deadline by two months, i.e., by 31st May 2025. As pre-registration is approaching, SPGC decided to request Chair, Senate to approve the recommendation of SPGC.

Sudhe

11.	Permission to proceed to other Academic Institutions as Non-Degree Students" for MSc students	Currently, both PG (M.Tech./M.Des./M.S. by Research/Ph.D.) and UG students are permitted to go to other academic institutions as non-degree students as per clause 6.1 (PG manual) and 11.5 (UG manual), respectively. There is no such provision for MSc students in MSc-MSPD manual. The proposal on this matter (Annexure M.11-A) from the SPGC subcommittee along with feedback from Departments/IDPs (Annexure M.11-B) were discussed. After due deliberations, SPGC recommended the subcommittee proposal. The proposed addition in MSc-MSPD manual (as clause 11.5) has been provided in Annexure M.11-C. This matter is to be placed in the Senate meeting for consideration.
12.	Revised Chapter 10 of MSc-MSPD manual (relevant for MSc-PhD Programme)	The proposed revision in Chapter 10 (for MSPD) (Annexure M.12-A) and corresponding feedback from Departments/IDPs (Annexure M.12-B) were discussed. After due deliberation, SPGC recommended the revision of Chapter 10 of MSc-MSPD manual as per Annexure M.12-A. This matter is to be placed in the Senate meeting for discussion and approval.
13.	Proposal for waiver of JAM Score for Foreign Nationals in M.Sc. program	The proposal from Dean of International relations (Annexure M.13-A) and related feedback from Departments/IDPs (Annexure M.13-B) were discussed. After due deliberations, SPGC recommended the waiver of JAM score for Foreign Nationals in MSc programme. This matter is to be placed in the Senate for discussion and approval.
14.	Online teaching mode request for BSE667 in summer term along with increase in number of seats as well as modification of pre-requisite	BSE667 course document mentioning the number of lectures in online and offline mode along with other details is provided in Annexure M.14. It was pointed out by DPGC convener (BSBE), about 50% of the content will be covered in clinics and 50% will be at IIT Kanpur. After due deliberation, due to logistics issues, SPGC recommended that BSE667 can be offered in summer. Since as per SPGC's understanding this course (a compulsory course of the program) will always run in summer only, it should be treated as a regular course being offered in summer term and not as a typical summer course (i.e., no honorarium is recommended for offering BSE667 in summer term). Furthermore, SPGC does not recommend an increase in the number of seats as well as change in pre-requisite as of now.

Annexure - B.1

Existing	**Proposed**
The applicant must have a bachelor's degree in engineering or a 4-year bachelor's degree in science, Design or Architecture with marks/CPI not below the specified minimum. Candidates holding degrees in Fine Arts or Interior Design are not eligible to apply.	The applicant must have a bachelor's degree in engineering or a 4-year bachelor's degree in science / Design (B.Des.) / Architecture (B.Arch) / Planning (B.Plan) / Pharmacy (B.Pharm) / Fine Arts (BFA) / Visual Arts (BVA) with marks/CPI not below the specified minimum or Master's degree in science or arts with marks/CPI not below the specified minimum.

Annexure M.7-A

Proposal from Physics Department shared with Departments/IDPs

Clause in PG manual (strikeouts indicate what's modified in the proposal):

11.7.1 Award of MSR degree with PhD degree to those students who are admitted to PhD program in ~~Engineering~~ directly after a B.Tech./BS(4Yr)~~/M.Sc. degree or have converted from MSR degree to PhD~~ degree:
All students who are pursuing the PhD degree directly after B.Tech./BS(4Yr)/M.Sc. degree can opt to get the additional MSR degree awarded along with the PhD degree at the time of graduation. This is subject to the following conditions:

1. The minimum total credit requirement will be 216 (the same as for PhD after B. Tech/BS/M. Sc).
2. The minimum number of thesis credits will be the sum of minimum number of thesis credits of MSR ~~(72)~~ and PhD (72), equalling ~~144~~.
3. The minimum number of course credits should be the maximum of C1 and C2, where C1 is the course credits required for MSR and C2 is the course credits required for PhD after B.Tech/BS/ ~~M.Sc.~~ ~~This~~ number varies between 36 and 90 depending on the department.
4. Only MSR thesis option will be available to the student and the problem which forms the major content of the MSR thesis ~~should~~ be different from the one reported in the PhD thesis. To ensure this, there should be plagiarism check performed between the MSR and the PhD thesis. Also, it is recommended that at least one member of the thesis oral boards should be common across the two boards.
5. Student can deliver open seminar after MSR defense without waiting for six months.

ADAPTED FOR PHYSICS DEPARTMENT (red fonts indicate modifications incorporated):

Award of MSR degree with PhD degree to those students who are admitted to PhD program in Physics directly after a B.Tech./BS(4Yr) degree:
All students who are pursuing the PhD degree directly after B.Tech./BS(4Yr) degree can opt to
get the additional MSR degree awarded along with the PhD degree at the time of graduation. This is subject to the following conditions:

1. ~~The request/application for additional MSR should be done within 4 months of deliverance of~~ SoTA; a TWP for MSR should be shared with DMC along with the TWP for the PhD thesis.
2. The minimum total credit requirement will be 216 (the same as for PhD after B. Tech/BS).
3. The minimum number of thesis credits will be the sum of minimum number of thesis credits of MSR (108) and PhD (72), equalling 180.
4. The minimum number of course credits should be the maximum of C1 and C2, where C1 is the course credits required for MSR and C2 is the course credits required for PhD after B.Tech/BS. For Physics department, C1=36 and C2=72. Additionally, PHY888, PHY701, and PHY702 are compulsory.
5. Only MSR thesis option will be available to the student and the problem which forms the major content of the MSR thesis must be different from the one reported in the PhD thesis. To ensure this, there should be plagiarism check performed between the MSR and the PhD thesis. Also, it is recommended that at least one member of the thesis oral boards should be common across the two boards.
6. Student can deliver open seminar after MSR defense without waiting for six months.

In line with a similar option (clause 11.7.1 in PG manual) already available to the Engineering students, the DPGC (PHY) proposes that following clause may please be adopted in the PG manual for the benefit of the PhD students who enter the PhD program of the Physics Department after BS(4Yr)/B.Tech program:

All students who are pursuing the PhD degree directly after B.Tech./ BS(4Yr) degree can opt to get the additional MSR degree awarded along with the PhD degree at the time of graduation. This is subject to the following conditions:

1. The request/application for additional MSR should be done within 4 months of deliverance of SoTA; a TWP for MSR should be shared with DMC along with the TWP for the PhD thesis.
2. The minimum total credit requirement will be 216 (the same as for PhD after B. Tech/BS).
3. The minimum number of thesis credits will be the sum of minimum number of thesis credits of MSR (108) and PhD (72), equalling 180.
4. The minimum number of course credits should be the maximum of C1 and C2, where C1 is the course credits required for MSR and C2 is the course credits required for PhD after B.Tech/BS. For Physics department, C1=36 and C2=72. Additionally, PHY888, PHY701, and PHY702 are compulsory.
5. Only MSR thesis option will be available to the student and the problem which forms the major content of the MSR thesis must be different from the one reported in the PhD thesis. To ensure this, there should be plagiarism check performed between the MSR and the PhD thesis. Also, it is recommended that at least one member of the thesis oral boards should be common across the two boards.
6. Student can deliver open seminar after MSR defense without waiting for six months.

Annexure M.7-B

Departments/IDPs feedback on the proposal of Department of Physics

Department	Proposal for additional MSR degree to PhD students from Department of Physics
AE	Department Response: The members deemed the proposal acceptable.
CE	The proposal is okay
CHM	The members agreed to the proposal and also please see the attachment for the chemistry department proposal.
ECO	This is to update you that we have discussed these items in the faculty meeting, and I did not get any specific feedback.
EE	EE does not have any specific feedback.
ES	Department unanimously agreed with the proposal for items 1, 2 & 4 (as per the appended email).
MSE	The department agreed with the modified clause related to MSR in the PG manual.

Sudha

MTH	In principle, the department agreed to award MSR degrees with PhD degrees to students joining after 4 years of BS/BTech. However, a detailed proposal will be communicated to SPGC after due deliberation.
PHY	We are not responding to point 4 as that was PHY's proposal only.
PSE	No comments.
SEE	The department suggest that the thesis credits for the PhD program should be at least equal to, or greater than thesis credits for the MSR program.

Annexure M.7-C:

The following changes are proposed in the PG manual.

Existing	Modified
11.7 Award of M.Tech./M.Des./MSR degree with PhD Degree **11.7.1 Award of M.Tech. / M. Des degree with PhD degree to those students who are admitted to PhD program in Engineering directly after a B.Tech./BS(4Yr)/M.Sc. degree or have converted from M.Tech./M. Des degree to PhD degree:** All students who are pursuing the PhD degree directly after B.Tech./BS(4Yr)/M.Sc. degree can opt to get the additional M.Tech. / M. Des degree awarded along with the PhD degree at the time of graduation. This is subject to the following conditions: 1. The minimum total credit requirement will be 216 (the same as for PhD after B.Tech/BS/M.Sc). 2. The minimum number of thesis credits will be the sum of minimum number of thesis credits of M.Tech.(63) and PhD (72), equaling 135. 3. The minimum number of course credits should be the maximum of C1 and C2, where C1 is the course credits required for M. Tech./ M.Des and C2 is the course credits required for PhD after B.Tech/BS/M.Sc. This number varies between 36 and 90 depending on the department. Refer Annexure IV for more details. 4. The student will have the option to either submit M.Tech./ M.Des thesis or credit an additional number of courses, in consultation with thesis supervisor and on the recommendation of the DPGC of the Department/IDP. The additional number of courses to be done in lieu of M Tech / M.Des thesis would be for a minimum of 63 credits. The minimum number of thesis credits in such cases will be 72 (instead of 135). 5. If the M.Tech / M. Des thesis option is exercised, the problem which forms the major content of the M Tech./ M.Des thesis should be different from the one reported in the PhD thesis. To ensure this, there should be plagiarism check performed between the MTech / M.Des and the PhD thesis. Also, it is recommended that at least one member of the thesis oral boards should be common across the two boards. 6. Student can deliver open seminar after M. Tech / M.Des defense without waiting for six months. 7. For MBA programme kindly refer to Annexure-V. **11.7.2 Award of MSR degree with PhD degree to those students who are admitted to PhD program in Engineering directly after a B.Tech./BS(4Yr)/M.Sc. degree or have converted from MSR degree to PhD degree:** All students who are pursuing the PhD degree directly after	**11.7 Award of M.Tech./M.Des./M.S. (by Research)/M.B.A. degree with Ph.D. degree** All students who are pursuing the Ph.D. degree directly after B.Tech./B.S. (4 year)/M.Sc. degree can get an additional M.Tech./M.Des./M.S. (by Research)/M.B.A. degree awarded along with the Ph.D. degree at the time of graduation, provided following conditions are satisfied: 1. The minimum total credit requirement will be 216. 2. The minimum number of thesis credits will be the sum of specified minimum number of thesis credits for M.Tech./M.Des./M.S. (by Research) and specified minimum number of thesis credits for Ph.D. 3. The minimum number of course credits will be the maximum of C1 and C2, where C1 is the course credits required for M.Tech./M.Des./M.S. (by Research)/M.B.A. and C2 is the course credits required for Ph.D. after B.Tech./B.S./M.Sc. in the Department/IDP concerned. Refer Annexure IV for more details. 4. Except in the case of M.S. (by Research) where a thesis will be required and M.B.A. where additional number of courses will be required, the student will have the option to either submit a thesis or credit an additional number of courses in consultation with thesis supervisor and on the recommendation of the DPGC of the Department/IDP. The additional coursework would be for a minimum of 63 credits. The minimum

B.Tech./BS(4Yr)/M.Sc. degree can opt to get the additional MSR degree awarded along with the PhD degree at the time of graduation. This is subject to the following conditions: 1. The minimum total credit requirement will be 216 (the same as for PhD after B. Tech/BS/M. Sc). 2. The minimum number of thesis credits will be the sum of minimum number of thesis credits of MSR (72) and PhD (72), equalling 144. 3. The minimum number of course credits should be the maximum of C1 and C2, where C1 is the course credits required for MSR and C2 is the course credits required for PhD after B.Tech/BS/M.Sc. This number varies between 36 and 90 depending on the department. Refer Annexure IV for more details. 4. Only MSR thesis option will be available to the student and the problem which forms the major content of the MSR thesis should be different from the one reported in the PhD thesis. To ensure this, there should be plagiarism check performed between the MSR and the PhD thesis. Also, it is recommended that at least one member of the thesis oral boards should be common across the two boards. 5. Student can deliver open seminar after MSR defense without waiting for six months.	number of thesis credits in such cases will be reduced by 63 credits. 5. In case a thesis is submitted, the problem which forms the major content of the thesis should be different from that reported in the Ph.D. thesis. To ensure this, plagiarism check should be performed between the M.S. (by Research)/M.Tech./M.Des. thesis and the PhD thesis. Also, it is recommended that at least one member should be common in the two thesis oral boards. 6. In case a thesis is submitted, open seminar can be delivered anytime after the thesis defense.
Annexure V: **3.** Provision for direct PhD students earning MBA with the extra course work: We have provision for (i) an MTech student converting to PhD, (ii) a PhD student exiting with MTech, and (iii) a PhD student without masters degree getting PhD as well as MTech degree with some extra work. In a similar vein, if the direct PhD student completes the course requirement of MBA, the student can be considered eligible for MBA degree as well.	To be deleted

Sudhe

Annexure M.9-A:

Excerpt from APC report (highlighted one is related to comprehensive exam)

augment the DMC report as recommended above. This report will be circulated among the members of the DMC and would be recorded in student files both at the department and at the institute level. A suggested template for the self-appraisal report is attached at the end of the report and may be further reviewed after wider discussions in the SPGC.

Six-member committee recommendation:

c. In the case of extension of a student's PhD program beyond 5 years, the DMCs should provide a plan of work to students.

Resolution 6:

Part (a)

The committee believes that lengthy extension in PhD programs is a major concern that puts the student under tremendous academic stress. To reduce PhD timeline, the committee proposes the following measures for all existing as well as future PhD students:

1. **The committee recommends the revision in timelines of the Comprehensive Examination and State-of-the-Art (SOTA). The Comprehensive Examination should be completed within three months of completing the minimum credits through coursework.**
2. **Following the Comprehensive Examination, the State-of-the-Art (SOTA) seminar can be delivered within the next three to six months. This will speed up the preparatory phase of the PhD programme.**
3. **It is recommended that the SOTA must necessarily be completed within four semesters of joining the PhD program.**
4. **The committee also suggests a change for expediting the current timelines of thesis evaluation.**

a) **The deadline for thesis submission after the Open Seminar be reduced from six months to three months.**

b) **The consent and the appointment of the external examiner should be initiated within two weeks after the recommendation of the DMC that thesis writing is near completion and a synopsis of the thesis is made ready. The synopsis submission will help identify the external examiner well in advance prior to thesis submission.**

c) **A consent from the examiner could also be sought and specific timelines be conveyed to the examiner that the review needs to be completed within four weeks but not later than six weeks.**

Part (b)

The committee believes that implementing measures given in Part (a) can effectively reduce the duration of PhD programmes. However, upon reviewing the PhD graduation data from the past decade, it was observed that approximately only about half of the enrolled PhD students complete their degrees within 6 years, while nearly 20% require more than 7 years to finish. [see the graphic under additional resolutions]

MINUTES
FOR THE 7th MEETING OF THE SENATE POSTGRADUATE COMMITTEE (2024-25) TO BE HELD ON April 2, 2025 (Wednesday) AT 10:30 AM
CONFERENCE ROOM (208), ACADEMIC AFFAIRS BUILDING

Annexure M.9-B:

AP (PG Report) - Comments of the Departments

S. No.	Dept.	Comments
1	MSE	No specific comments on resolution 6
2	CHM	Our department is more or less ok
3	CE	No specific comments on resolution 6
4	ES	No specific comments on resolution 6
5	DoMS	No specific comments on resolution 6
6	MTH	Resolution 6, Part (a), 4(a): The department does not agree – 6 months after Open seminar is a good time to take stock and submit thesis. The department is fine with the other resolutions.
7	SPASE	R6: We welcome this positive move benefitting students, continuing beyond 5 years for PhD students.
8	EE	R6: Part A 1. The department recommends to continue the existing practice.
9	ECON	Resolution 6: 3 months is too short a time between the Open Seminar and Thesis submission. A minimum of 6 months is appropriate. No specific comments on resolution 6(1)
10	CSE	None
11	GSMST	None
12	SEE	R6: a-3: Extension upto 1 sem should be given to PhD students admitted directly after BT/MSc-2Y programs. No specific comments on resolution 6(1)
13	ChE	The remaining points are basically counselling/DMC/DPGC related ie cosmetic.
14	PHY	No specific comments on resolution 6
15	ME	No specific comments on resolution 6
16	HSS	The department discussed the report in detail and agrees with most of the resolutions. However, there are a few points of disagreement - While there is agreement regarding the reduction of timeline for Comprehensive Exam, it is proposed that there should be a provision to request for extension up to six months.
17	BSBE	**Resolution 6 - Part A. -** We feel that the current system of SoTA within 5 semesters should continue. Our experience is that students struggle to give SoTA before that. In fact often students seek extension (as per current norm) for delivering SoTA.
18	CGS	The department is fine with the proposal. However, we do think that providing increased stipend in the 6th year and encouraging students to submit earlier may send conflicting message.

MINUTES
FOR THE 7th MEETING OF THE SENATE POSTGRADUATE COMMITTEE (2024-25) TO BE HELD ON April 2, 2025 (Wednesday) AT 10:30 AM
CONFERENCE ROOM (208), ACADEMIC AFFAIRS BUILDING

Annexure M.9-C

Proposed changes in clause 8.2 of the PG manual

Existing	Modified
8.2. Students admitted with B.Tech., M.Sc., M.A. or M.Phil. degrees or part-time students with M.Tech. or equivalent degrees may appear in the comprehensive examination earliest at the end of the second semester, but must pass it before the end of the fifth semester after their first registration. Students admitted with M.Tech. or equivalent degrees may appear in the comprehensive examination earliest at the end of the first semester, but must pass it before the end of the fourth semester after their first registration. The above time limits are exclusive of the period of sanctioned leave, if any.	**8.2.** All PhD students must pass the comprehensive examination within four months of completing the minimum credits through coursework. For a well merited case, this period can be extended for two more months by the SPGC on the recommendation of DPGC. However, in no case, the date of passing the comprehensive examination should go beyond four semesters after the first registration. The above time limits are exclusive of the period of sanctioned semester leave, if any.

Annexure M.11-A:

Proposal for Permission to proceed to other Academic Institutions as Non-Degree Students

In order to help students to broaden their horizons and gain course-work experience, they may be permitted to proceed to other academic institutions in India or abroad as a non-degree student. The following guidelines and procedures apply for this purpose:

i. A student who satisfies the minimum eligibility conditions given below may spend up to ~~two semesters and/or two summer terms,~~ one semester and/or one summer term in any academic institution of repute in India or abroad with prior permission of the ~~SUGC~~ SPGC.

ii. The semester spent as a non-degree student will be counted as a part of the time spent in pursuit of the degree.

1.1 Eligibility

i. Completion of ~~200~~ 100 credits of course work

ii. CPI of at least 7.0.

1.2 Application Procedure

i. The student shall make an application to ~~SUGC~~ SPGC through the concerned ~~DUGC~~ DPGC, giving details of the proposed programme and shall submit a statement of purpose with sufficient information about the Institution where s/he has chosen to spend time as a non-degree student.

ii. The ~~DUGC~~ DPGC shall examine the student's proposal to determine whether the proposed programme is of a nature that the student will benefit from the exposure.

iii. On the recommendation of the ~~DUGC, SUGC~~ DPGC, SPGC may approve the proposal and grant permission, with leave of absence, to the student to proceed as a non-degree student to the selected Institution.

iv. Any application for waiver of credits at IIT Kanpur or transfer of credits from the other Institution shall be decided in accordance with the procedure given in section 1.3.

1.3 Transfer of Credits and Waiver in-lieu thereof

i. Permission to proceed to another institution as a non-degree student does not imply that the student will automatically get waiver from the academic and other requirements of her/his ongoing ~~undergraduate program~~ MSc programme at the Institute.

Sudha

ii. On return, s/he may apply for waiver of courses from her/his program template which s/he thinks are equivalent to the courses successfully completed at the visited Institute as a non-degree student. With the application, the student must submit an official transcript of the grades obtained by her/him at the visited Institute as a non-degree student and other documents/material that the concerned ~~DUGC~~ DPGC may require for evaluation. The ~~DUGC~~ DPGC will determine, by whatever means it deems fit, the equivalent courses (credits) and/or requirements for which the student may be given a waiver in her/his undergraduate programme at IIT Kanpur.

iii. On the recommendation of the ~~DUGC, SUGC~~ DPGC, SPGC may allow a student a waiver for a maximum of ~~100~~ 60 credits against the course work completed elsewhere as a non-degree student.

iv. Against each course or requirement for which a waiver is granted, symbol "W" would appear on the Grade Report with an explanatory note that it stands for waiver granted due to courses taken and/or work done at the selected Institution elsewhere. All such courses and/or requirements will be deemed to carry zero credits for SPI/CPI calculation.

v. Under no conditions will the grades earned at any other Institution appear on the Grade Report.

Those students who are selected by the Institute, using the Senate-prescribed rules and procedures, to proceed on any Institutional exchange programme will also be governed by these clauses for the transfer of academic credits, waiver, etc.

Annexure M.11-C:

Dept.	**Permission to proceed to other Academic Institutions as Non-Degree Students" for MSc students (By subcommittee of SPGC)**
ES	Department agrees with this proposal. After completion of minimum requirements of credits and CPI, students can proceed to other Academic Institutions as non-degree students.
CHM	The sub-committee proposal is unanimously approved by the DPGC members. The members also point out that if any student claim their summer stay elsewhere as an intern project, then he has to be registered in the respected university/institute as non- degree student. Valid document needs to be produced for the waiver of the project in the third semester (relevance to chemistry department as they do project both in 3rd and 4th semesters).
CHE	Our department is in favour of all the three proposals
SEE	Overall proposal is acceptable. What is the rationale for waiver for a maximum of 60 credits against the course work completed elsewhere?
EE	Electrical Engineering department does not have any comment on this matter.
AE	No feedback as we have no MSc program
MTH	The Department of Mathematics and Statistics agrees with SPGC's proposal and recommends implementation. The department suggests that the credit requirement to be eligible to proceed to other academic institutions as Non-Degree students can be set as 90 instead of 100 in the proposed policy
MSE	The proposal was welcomed. However, the following points should be considered before implementation. •More clarity should be provided on the number of credits and waivers. •Eligibility: minimum CPI should be increased from 7.0 to 8.0 Institutions should be chosen based on the NIRF ranking, not just "in any academic institution of repute in India"
PHY	Physics department is not in favour of adopting this scheme for its students as MSc program is too short to allow such things.
Civil	Accepted

Sudhe

Annexure M.11-C:

Addition of clause 11.5 in MSc-MSPD manual

11.5. Permission to proceed to other Academic Institutions as Non-Degree Students

In order to help students to broaden their horizons and gain course-work experience, they may be permitted to proceed to other academic institutions in India or abroad as a non-degree student. The following guidelines and procedures apply for this purpose:

i. A student who satisfies the minimum eligibility conditions given below may spend up to one semester and/or one summer term in any academic institution of repute in India or abroad with prior permission of the SPGC.

ii. The semester spent as a non-degree student will be counted as a part of the time spent in pursuit of the degree.

11.5.1. Eligibility

i. Completion of 100 credits of course work

ii. CPI of at least 7.0.

11.5.2. Application Procedure

i. The student shall make an application to SPGC through the concerned DPGC, giving details of the proposed programme and shall submit a statement of purpose with sufficient information about the Institution where s/he has chosen to spend time as a non-degree student.

ii. The DPGC shall examine the student's proposal to determine whether the proposed programme is of a nature that the student will benefit from the exposure.

iii. On the recommendation of the DPGC, SPGC may approve the proposal and grant permission, with leave of absence, to the student to proceed as a non-degree student to the selected Institution.

iv. Any application for waiver of credits at IIT Kanpur or transfer of credits from the other Institution shall be decided in accordance with the procedure given in section 1.3.

11.5.3. Transfer of Credits and Waiver in-lieu thereof

i. Permission to proceed to another institution as a non-degree student does not imply that the student will automatically get waiver from the academic and other requirements of her/his ongoing MSc programme at the Institute.

ii. On return, s/he may apply for waiver of courses from her/his program template which s/he thinks are equivalent to the courses successfully completed at the visited Institute as a non-degree student. With the application, the student must submit an official transcript of the grades obtained by her/him at the visited Institute as a non-degree student and other documents/material that the concerned DPGC may require for evaluation. The DPGC will determine, by whatever means it deems fit, the equivalent courses (credits) and/or requirements for which the student may be given a waiver in her/his undergraduate programme at IIT Kanpur.

iii. On the recommendation of the DPGC, SPGC may allow a student a waiver for a maximum of 60 credits against the course work completed elsewhere as a non-degree student.

iv. Against each course or requirement for which a waiver is granted, symbol "W" would appear on the Grade Report with an explanatory note that it stands for waiver granted due to courses taken and/or work done at the selected Institution elsewhere. All such courses and/or requirements will be deemed to carry zero credits for SPI/CPI calculation.

v. Under no conditions will the grades earned at any other Institution appear on the Grade Report.

Those students who are selected by the Institute, using the Senate-prescribed rules and procedures, to proceed on any Institutional exchange programme will also be governed by these clauses for the transfer of academic credits, waiver, etc.

Revised Chapter 10 of MSc-MSPD manual

Chapter 10

Rules Governing Change, Addition in the MSc-PhD (Dual Degree) Programme

10.1 Admission and conversion Procedure

A) **New Students:** Admission to the Programme is strictly through the Joint Admission Test for Masters (JAM), according to the All-India Rank (AIR) and the preference given by the candidate. All admission rules are identical to MSc (2-year) programme.

B) **IITK MSc (2-year) Students:** Students admitted in the MSc (2-year) programme may apply for MSPD programme in departments where it is available, subject to fulfilment of eligibility criteria as mentioned below and availability of seats in the programme.

(i) *Eligibility:* CPI of 7.0 or more and no backlogs at the time of applying.

(ii) *Application Process:* Students may apply at the end of their third semester (but before the date of registration for the fourth semester). Students should include two letters of recommendation with the application. At least one of the letters should be from an instructor with whom the student has done a course at IIT Kanpur. Applications shall be considered by a selection committee, to be set up by the head of the department, and approved by the Chairperson, SPGC. The recommendations of the selection committee shall be approved by SPGC.

10.2 Academic Roadmap

1) From the perspective of whether MSc or PhD rules apply, the time spent in completing the MSPD's first 3 years of approved coursework is split into two parts:

A) *First two years of coursework:* During this period an MSPD student will be governed by the rules meant for MSc (2-year) students (except for the course template, see Annexure I).

B) *Third year of coursework:* MSPD students migrate to the PhD part of the programme provided they have cleared all the courses of the first four semesters as per MSPD template with at least 6.0 CPI. Students who have converted from MSc (2-year) to MSPD are allowed to have PHY563 and PHY566 mapped to PHY501 and PHY502. Furthermore,

(i) Till a student migrates to PhD part, they will be governed by MSc (2-year) rules (except for the course template). After migration, the student will be governed by the rules meant for the PhD students (except for the course template).
(ii) When a student migrates late (after fifth or later semester), then the already done third-year-courses in the template should be counted towards their PhD coursework.

2) If a student completes the 3-year coursework but is still unable to migrate (CPI less than 6.0), then the student is allowed to either (a) exit the programme with an MSc (2-year) degree or (b) continue doing extra elective courses to improve the CPI to 6.0. The maximum duration in such cases is (1.5 times of normal duration) 9 semesters.

3) MSPD student will get an MSc (2-year) degree after successful completion of the full three-year-course-template of MSPD program.

10.3 Summer Term

Until MSPD students migrate to the PhD part of the programme, they are expected to spend a minimum period of 8 weeks during every summer term doing a project on campus with a faculty member of the Department of Physics, IIT Kanpur. A co-supervisor from within IITK or outside IITK is allowed. However, if they spend time outside IITK for the project, they will not get funding from two sources. A student who does not do such a project is not eligible to receive any assistantship during the summer term.

10.4 Financial Assistance

Sudhe

1) All MSPD students are eligible to get a financial assistantship of Rs.6000/- p.m. in the first semester. For subsequent semesters, they must have a minimum CPI of 6.5 to avail this assistantship. For a student with a CPI of less than 6.5, the assistantship will be discontinued until her CPI rises to 6.5 or above and shall be resumed in the following next semester, provided that they have not converted/migrated as PhD student in the meantime.

2) If an MSPD student has not converted/migrated as PhD student at the end of four semesters, due to reasons such as backlogs and semester drops, and the CPI is not less than 6.5, then the assistantship, which had earlier been withheld, may be awarded. The decision will be taken on case-to-case basis, depending on the merit.

3) Under no circumstances shall a student receive assistantship for more than a total of four semesters.

Annexure I (MSPD course template: 15.2 of MSc-MSPD manual)

Sem I	Sem II	Sem III	Sem IV	Sem V	Sem VI
PHY401 [11]	PHY412 [11]	OE-1 [9/11]	PHY502 [9]	PHY696 [9]	PHY697 [9]
PHY421 [11]	PHY552 [11]	PHY462 [8]	OE-2 [9/11]	PHY698 [9]	PHY699 [9]
PHY431 [11]	PHY626 [11]	PHY501 [9]	PHY611 [11]	PG-OE-1 [9/11]	PG-OE-2 [9/11]

Annexure M.12-B:

Dept.	Revised Chapter 10 of MSc-MSPD manual (relavant for MSc-PhD Programme)
ES	Department agrees with this revision and provision for conversion of MSc to PhD programme after suitable minimum requirements as stated in the proposal
CHM	The DPGC members agreed with the sub- committee's recommendation for MSPD revised proposal. The members also of the opinion that the department can initiate to have this program available for our department as well so that two-year MSc students, if they wish to stay here for the PhD can apply for this program at the end of the third semester. This will then be ratified by the committee setup by the HOD, duly forward by the DPGC for SPGC's recommendation
CHE	Our department is in favour of all the three proposals
SEE	Accepted, But Sec. 10.4 Financial Assistance need clarity before and after migration to PhD
EE	Electrical Engineering department does not have any comment on this matter.
AE	No feedback as we have no MSc program
MTH	The department has no comment on it.
MSE	accepted
PHY	No comments
Civil	Accepted

Proposal from DoIR

Request for waiver of JAM Score for Foreign Nationals in our M.Sc. program

From Dean of International Relations, IIT Kanpur

Summary Headers

Dear Prof. Singh and Prof. Mohapatra,

I hope this email finds you well.I am writing to bring to your attention an important matter regarding the admission process for foreign nationals in our M.Sc. programs.

We have been receiving applications for PG (MTech. & MSc.) and PhD program from foreign nationals/NRI/PIO, routed through Indian High Commission/Embassies, or the Indian Council for Cultural Relations (ICCR).

However, we are only considering these applications for MTech. program who have waiver of GATE score. As per the current admission guidelines, Foreign Nationals are not eligible for the M.Sc. program without a valid JAM score. Many foreign nationals applying to the M.Sc. program may not have appeared in the JAM examination or an equivalent test, which limits their ability to
fulfill this requirement. The Number of applicants for the M.Sc. program for the past academic year is given below:

No. of Foreign applicants in M.Sc. Program

Academic Year

Sudha

To address these concerns, I would like to propose a waiver of the JAM (Joint Admission Test for M.Sc.) score requirement for foreign nationals applying to M.Sc. program, similar to the GATE score waiver extended to MTech students.

I suggest evaluating these applicants based on their academic transcripts, letters of recommendation, statement of purpose, and any other relevant criteria (online or in-person interview) that provide a comprehensive view of their qualifications and potential for success in our program.

I kindly request your support in discussing this proposal during the upcoming SPGC meeting. Your input and insight into the feasibility of this policy change and its implementation would be invaluable.

Thank you for considering this request. I look forward to hearing your thoughts on this initiative to further enhance our M.Sc. programs for international students.

Thanks and Best Regards,
Bushra

Annexure M.13-B:

Dept.	Proposal for waiver of JAM Score for Foreign Nationals in M.Sc. program: Proposed by Dean of International Relations
ES	Department agrees with waiver of JAM Score for Foreign Nationals in M.Sc. program
CHM	The members opined that the foreign national student can be considered for MSc program without JAM, however, it needs to carefully evaluate through various metrics including academic transcripts, letters of recommendation, statement of purpose, and any other relevant criteria (online or in-person interview) by the committee/DPGC before their recruitment in the department for MSc program.
CHE	Our department is in favour of all the three proposals
SEE	Accepted
EE	Electrical Engineering department does not have any comment on this matter.
AE	Waiver is acceptable

Sudha

MTH	The jam requirement may be waived for foreign national candidates. However, the departments should be allowed to have a shortlisting criteria before interviewing the candidates. Given the increasing number of applicants, interviewing all the candidates will not be practical. Per PhD admission guideline 2024-25, interviews for all foreign national PhD candidates are mandatory. It is recommended that this policy be reviewed for PhD applicants, and a similar policy should not be implemented for MSc applicants after the Jam waiver.
MSE	accepted
PHY	Department agrees to the proposal in principle but would like the seats to be supernumerary. Also, the department wants clarification about the exact process to be followed to select such students.
Civil	Accepted

Dear Prof. Singh

Prof. Amitabha Bandyopadhyay from our department had floated a course and it was approved, now he wants the permission to take partial online classes the reason can be seen in the "rationale below. He also needs approval to increase the student strength from 20 to 40 (point 2 below), third point is about some pre-requisite for UGs (please see below point 3).

1. BSE667 - It is approved. We need approval/permission for teaching a few lectures ONLINE.

Rationale - This course runs concurrent to the students' visit to a hospital for problem discovery. Also, this is the reason why this course must be offered in the summer. It is critical to teach them a few lectures (in person) before they start for the hospital/clinical immersion alerting them to what to look out for in the hospital and how to interact with healthcare workers, including doctors/nurses/admin staff etc. Some lectures are structured in a manner to help them identify the right problem statements and these have to be delivered while they are in the hospital(s) and thus need to be delivered ONLINE. Again, once they come back, a few lectures will be needed to help them fine tune the problem statements.

2. It is approved for a class size of 20. We need it to be approved for a class size of 40.

3. In the approved course description, it is stated that "UGs must have completed 4 semesters but not more than 5 semesters". This needs to be replaced by - "UGs must have completed 4 semesters but not more than 6 semesters".

Dear Appu,

Please refer to the attachment. I have marked the lectures that are to be delivered offline. Few hours prior to the departure of the students for "Clinical Immersion" and few hours once they come back from the clinical immersion.

As discussed, the design of the course is such that all lectures cannot be delivered offline. This is why I am seeking Senate's approval for delivering a few lectures in the online mode. It is necessary as Senate has mandated that all lectures must be offline.

Please feel free to ask me for any further clarification.

Regards,

Amitabha

BSE667

Indian Institute of Technology Kanpur
New Course Proposal

Course Number: ~~698A~~ 667
Course Title: Healthcare Ventures & Enterprises I
Per Week Lectures: Lectures/Tutorials/Labs/Additional hours
Course Duration: Full semester (summer)
Proposing Department: BSBE
Other Departments/IDPs which may be interested in the proposed course: Design Dept
Other faculty members interested in teaching the proposed course: Prof. J.Ramkumar, Prof. B.V. Phani and Mr. Srikant Sastri (expected to soon join as a visiting Prof. of Practice)
Proposing Instructors: Prof. Amitabha Bandyopadhyay
Lecture Duration: 3 hours (2 x 1.5 hours per week)
Class size: 20 (B.Techs; M.Techs & PhDs) (UGs must have completed 4 semesters but not more than 5 semesters)
Teaching hours: 14 classes*3 hours (42 hours).

Course Description:

A) Objectives: The course will expose students to the world of healthcare innovation. The emphasis will be on showing how real innovation is made possible by identifying 'problem statements' that are derived by working closely with clinicians, and observing customer behaviour. Students will also learn to appreciate how fundamental principles of innovation are universally relevant, *whether at a start-up, or as a new unit in a big company*. This course is in consonance with the recently-adopted 'Student Entrepreneurship Policy'; it prepares students for entrepreneurship through structured learning and hands-on experience.

B) Course Content:

Class#	Broad Topic	Topics	Duration (hours)
1 &2	Team formation & Problem Statement	Developing relevant problem statements. Lessons from case studies. Identifying common areas of interest for groups of students	6
3 & 4	Secondary Research	Gaining insights from available secondary literature, and framing initial hypotheses around the problem statements. Preparing for clinical immersion	6
5, 6 & 7	Clinical/customer immersion	Work closely with clinicians and/or customers to observe the	9

Offline Pre-Departure

Sudhe

Online, students are at a hospital

		'need gaps', and attempt to validate the initial hypotheses.	
8	Mid-point Immersion review	Peer review and learning in the class where early experiences from clinical/customer immersion are shared	3
9, 10 & 11	Clinical/customer immersion	Continue to work closely with clinicians and/or customers to observe the 'need gaps', and validate the initial hypotheses	9
12	Insights & new directions	Evolution & modification of original 'problem statement' & idea based on clinical immersion. Structured documentation of market insights, and developing User Personas	3
13	Product strategy-Part one	Developing a 'Value Proposition' & initial set of product features	3
14	MVP Design & prototyping plan	Structured '5-pillar' framework for MVP Design. Create a prototyping plan	3

Lectures to be delivered offline upon return of the students

Pre-requisites: Should have an interest in healthcare innovation (instructor consent based on application & interview). For this year alone, UGs should have completed at least 3 semesters at the time of application (in future years, students will be asked to apply during the 3rd semester itself). Registered students must be willing to work in teams of four. Each team of 4 must comprise a set of people with complementary skill sets. A team must ideally have two persons with strong technical skills, one with business analysis skills, and one person with sales/marketing mindset.

Summary: Healthcare innovation will drive quality and affordable healthcare in the post-Covid world. Rapid technology changes (especially AI & digital health) are enabling dramatic new products and services globally. Modernisation of healthcare infrastructure in India, as also import substitution, is driving medical device innovation in India. *Success however lies in developing products and services (whether physical or digital) that are based on real clinician and market insights*
